Development, production and sale of sealing materials, noise and vibration isolation

Syzran

Founded in: 2002

The main share of customers are suppliers of construction companies (dealers).

The company is actively developing both B2C and B2B.

SCIENTIFIC AND PRODUCTION ENTERPISE TOKAR Co., Ltd.

SPE TOKAR Co., Ltd. is a developer and the only manufacturer in Russia of a highly effective polyfunctional additive D-5 for concrete, mortars, dry construction mixtures and cements.

The core activities of the company:

- industrial production of highly effective additives for concrete, mortars, dry construction mixtures and cements;
- development of innovative additives for concrete, mortars, dry construction mixtures.

Since 2006, the company has been producing an innovative, multifunctional additive D-5 for concrete. D-5 additive improves water resistance, durability and sulphate resistance of concrete, what enables eliminating additional waterproofing of reinforced concrete structures completely and apply White Bath technology even in highly aggressive environments, including sea water. It is not inferior to the best foreign analogues, but is much cheaper in price.
