ERBIL BUILDING

DISCOVER THE POTENTIAL OF IRAQ

In Iraq, the increase in oil supply and revenue the contracting sector has entered a period of rapid growth. Construction work and building materials market is developing day by day . The main infrastructure in Iraq investments, water supply projects, waste water treatment plant, electricity power plant, hospital, school and housing construction, road, airway, bridge and port construction areas.

Because of the increase in the number of reconstruction, repair and construction projects and the required investment amount in this area is around 100 billion US dollar,It is predicted that it will remain it's dynamic for the next years .

A strong basis for the production of construction-related materials in Iraq is available and Iraqi government is seeking for financiers to make government -private-sector partnership in construction sector. There are partnership opportunities in steel, cement, bricks, glass and marble sectors .

According the researches 44,700 new housing units needed in Basra. And the same needed in Erbil and Baghdad. Housing is a national priority,however, a significant amount of special sector investment is needed. At the moment a lot of projects are planed to develop the infrastructure of Iraq.

The priority of the Iraqi government is the rehabilitation of railways, electricity generation, transmission and distribution networks.
