阿拉伯语报纸。沙特阿拉伯的GDP增长了5.4%。

Data from the General Authority for Statistics in Saudi Arabia showed that the Kingdom's real GDP grew by 5.4 percent in the fourth quarter of 2022, compared to the same period in 2021.

According to the authority, this growth is due to the increase achieved by non-oil activities by 6.2 percent, in addition to the increase in oil activities by 6.1 percent. Government services activities also increased by 1.8 percent.

According to the authority's data, seasonally adjusted real GDP achieved an increase of 1.5 percent in the fourth quarter of last year 2022, compared to the previous quarter of the same year. This increase was due to a growth in non-oil activities of 1.7 percent. Government services activities increased by 0.5 percent. While Oil activities fell by 0.3 percent.

In addition, the real GDP for 2022 achieved a growth rate of 8.7 percent compared to the previous year 2021. This is due to the growth of oil activities by 15.4 percent, while non-oil activities achieved a growth rate of 5.4 percent, in addition to the growth of government services activities by 2.2 percent.

Kuwait's Foreign Assets Increased by 8 percent

Kuwait's foreign reserve assets in 2022 increased by 8 percent year-on-year, amid improved oil revenues. The monthly report of the Central Bank of Kuwait showed that Kuwait's reserve assets rose to KD 14.779 billion ($48.5 billion) by the end of December 2022, from KD 13.68 billion ($44.9 billion) at the end of the same month of 2021.

Kuwait's reserves included about 13.12 billion dinars ($43 billion) balance of deposits and currencies, 1.34 billion dinars of Kuwait's Special Drawing Rights with the International Monetary Fund, as well as 232.4 million dinars of balance with the Fund, and gold of about 31.7 million dinars by the end of December 2022. Foreign reserves do not include the external assets of the General Investment Authority (sovereign fund), which exceed $708.4 billion, according to the latest data from the Sovereign Wealth Fund Institute (SWFI).

The oil sector accounts for more than 90 percent of Kuwait's government revenues, so it benefited from a rebound in oil prices over the past months before declining. Kuwait currently produces more than 2.8 million barrels per day of oil, its share under the OPEC Plus agreement.
