10 people have won $381 Billion since the Beginning of 2023!

The wealth of Tesla CEO Elon Musk has risen at the fastest pace among the billionaires on the "Bloomberg" list of the super-rich, as his wealth has gained an additional $88.1 billion since the beginning of 2023. The total wealth acquired by the 10 richest billionaires since the beginning of the year amounted to $381 billion, which means that Elon Musk’s share is close to a quarter of those gains by 23.1 percent after his wealth rose to $225 billion. The list witnessed a complete dominance of technology billionaires, as 8 out of the 10 most profitable billionaires are linked primarily to technology, especially Tesla, Microsoft, Google, Oracle, NVIDIA, Amazon, and Facebook.

Re-election of Ahmed Al-Wakil to head the Federation of the White Sea Chambers of Commerce

The member chambers of the Federation of White Sea Chambers of Commerce and Industry "ESCAMI" re-elected Ahmed El-Wakeel, President of the Alexandria Chamber, to preside over the federation until the end of 2024, with the unanimous consent of all chambers, during their meetings in Barcelona, Spain. The federation brings together more than 300 chambers from 23 countries bordering the White and Black Seas, representing more than 100 million companies.

Al-Wakil indicated that the Union of Chambers of the Mediterranean currently has 27 regional sectoral projects to support cooperation between companies from the two parts of the Mediterranean funded by grants from the European Union with more than 120 million euros in the sectors of industry, support for entrepreneurs, renewable energy, agriculture, environment, and sustainable tourism. In addition to facilitating companies’ access to soft loans, investment risk guarantees, and trade financing available from various banks and development funds, which exceed 22 billion euros.

Egypt Allocates $4.14 Billion to Support Food in the 2023-2024 Budget

Egypt has allocated 127.7 billion Egyptian pounds ($4.14 billion) to the food subsidy program in the budget for the fiscal year 2023-2024, which begins on the first of July 2023. Egypt, with a population of 105 million, is one of the world's largest importers of wheat and is also dependent on imports of other staple foods and fuel.

The Ministry of Finance estimated Egypt's need for 8.25 million tons of wheat in the next fiscal year, while the budget was based on an oil price of $80 per barrel of Brent crude. According to the draft budget, it is expected to spend 2.991 trillion Egyptian pounds and generate revenues of 2.142 trillion pounds in the new fiscal year. It is also expected that the total deficit will reach $82.44 billion or 6.96 percent of the gross domestic product.

Oil Prices Make up for their Losses, and Brent Crude Jumps by More than 3 Percent

Oil prices rose to a limited extent amid the continued state of caution ahead of the expected monetary policy decisions of the Federal Reserve (the US Central Bank) and other central banks.

Brent crude futures rose $2.13, or 3.2 percent, to $74.15 a barrel and US West Texas Intermediate crude rose $2.17, or 3.23 percent, to $69.29 a barrel.

The two benchmarks fell by about $3 a barrel, as analysts focused on global supply growth and demand concerns ahead of key inflation data and the two-day Fed meeting that ends on Wednesday.

The Pioneers of "Artificial Intelligence" Agree on its Seriousness and Disagree about its Regulation

A new filing reveals that Google and OpenAI, two US companies in the field of artificial intelligence, have opposing ideas about how the technology should be regulated by the government.

Google is one of the leading developers of generative AI with the launch of its own Chabot known as "Bard"; along with Microsoft-backed OpenAI and creator of the most popular app, ChatGPT.

Moreover, while OpenAI CEO Sam Altman promoted the idea of a new AI-focused government agency to handle its complexities and license the technology, Google declared that it favored a layered, multi-stakeholder approach to AI governance.
